6.4kg/m Galvanised Metal Scaffold Tube with 420N/mm2 3.2 thickness steel pipe

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Minimum Order Quantity: 1000
- Price: $5-$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Tensile Strength: 420N/mm2
- Corrosion Resistance: Excellent
- Bending Radius: >2.5D
- Diameter: 48.3mm
- Elongation: >20%
- Surface Treatment: Galvanised
- Yield Strength: 245N/mm2
- Material: Galvanised Steel
- Highlight: **Galvanized Scaffolding Pipe**, **Metal Galvanised Scaffold Tube**

Product Description

Product Description:

Galvanised Scaffold Tube is made of galvanised steel, which has excellent corrosion resistance and provides a strong and sturdy base for scaffolding structures. Our Galvanised Steel Scaffolding Tube is manufactured in accordance with EN39 standards and has an elongation greater than 20%. It has a diameter of 48.3mm, and is available in 6m lengths for optimal coverage. This Galvanised Scaffold Piping is designed to provide maximum durability and strength for your scaffolding structures, whilst also offering a high level of corrosion resistance.

Technical Parameters:

Parameter	Value
Name	Galvanised Scaffold Tube
Application	Scaffolding
Diameter	48.3mm
Length	6m
Weight	6.4kg/m
Bending Radius	>2.5D
Tensile Strength	420N/mm2
Standard	EN39
Surface Treatment	Galvanised
Elongation	>20%

Applications:

Bythai Scaffolding's Galvanised Scaffold Tube, model BT01, is a reliable product from China with SGS certification. It is available at a price range of $5-$18 per unit and can be shipped in bundles. The delivery time is 7-15 days, and payment terms can be either TT/LC. The supply ability is 1000 tons per month, with a yield strength of 245N/mm2 and excellent corrosion resistance. The thickness is 3.2mm, and the diameter is 48.3mm, with a galvanised surface treatment.
Bythai's Galvanised Scaffold Tube offers the perfect combination of strength and durability, making it ideal for many applications. It is widely used in the construction industry for scaffolding, as well as for a variety of other purposes. The galvanised coating ensures superior protection against corrosion, and the product is trusted by professionals for its strength and reliability.
Bythai Scaffolding is a trusted and reliable supplier of Galvanised Scaffold Tube, with a wide range of sizes and shapes to choose from. The product is competitively priced and offers superior quality and performance. With superior corrosion resistance and excellent strength, Bythai's Galvanised Scaffold Tube is the perfect choice for scaffolding projects.

Customization:

We offer customized services for Galvanised Scaffold Tube products. Our products are manufactured by Bythai Scaffolding, with the model number BT01, and are certified by SGS. The price ranges from $5 to $18, and the packaging is in bundles. The delivery time is 7-15 days, while the payment terms are TT/LC. We have a supply ability of 1000tons per month. This Galvanised Scaffold Tube has excellent corrosion resistance and a weight of 6.4kg/m. The surface treatment is galvanised, the standard is EN39 and the elongation is >20%.

Packing and Shipping:

Galvanised Scaffold Tube is packaged using either shrink wrap packaging or plastic bubble wrap packaging. The tubes are then placed in strong cardboard boxes and secured with tape. The boxes are then loaded onto pallets and secured with plastic or metal strapping. The pallets are then loaded onto a truck and shipped to the customer.

Advantages:
- Strong and reliable: Galvanized steel pipes provide a solid support structure and are suitable for scaffolding construction to ensure construction safety and stability.
- Durability: Galvanizing treatment increases the durability of steel pipes, extending their service life and reducing maintenance costs.
- Multi-purpose: Suitable for a variety of applications including construction, pipeline, marine and stage construction.
