Product Description

Product Description:

Scaffolding Plank is an essential scaffold supporting plank widely used in construction sites. It is manufactured with solid structure and customized weight and thickness, so that it can meet the requirements of various construction projects. The surface of the scaffolding plank is made of steel, which is strong and durable. The packaging is usually in containers, making it easy to transport. Scaffolding Plank is a reliable and cost-effective choice for any scaffolding project.

Features:

Product Name: **Scaffolding Plank**
Packaging: **Container**
Usage: **Scaffolding**
Design: **Standard**
Edge: **Smooth**
Material: **Steel**
Special Features: **Scaffold Supporting Plank, Supporting Board for Scaffolding**

Technical Parameters:

Parameter	Value
Thickness	Customized
Usage	Scaffolding
Weight	Customized
Design	Standard
Material	Steel
Length	Customized
Surface	Pre-galvanized/hot Dip Galvanized
Color	Steel
Width	Customized
Packaging	Container

Applications:

Bythai BT02 Steel Solid Scaffolding Plank

The Bythai BT02 Steel Solid Scaffolding Plank is a perfect choice for those looking for a durable and reliable scaffolding solution. Made from high-quality steel, this strong and sturdy plank is the perfect option for any scaffolding application.
