Applications:

Adjustable Steel Prop, also known as building support or tripod, is a necessary tool for construction work. It is made of durable steel material and manufactured by BM211 with the highest quality standards. This product is adjustable to meet different heights and is lightweight for easy transportation. The price of the steel props ranges from 4.5 to 8.5, depending on the quantity ordered. The minimum order quantity is 1500 and the delivery time is 10 to 25 days, with the container packaging.
The Adjustable Steel Prop is widely used in the construction industry because of its durable material and adjustable height. It is perfect for supporting various types of structures and keeping them stable. It is also very reliable and can withstand extreme weather conditions. The adjustable steel prop is also cost-effective and can be used multiple times.
If you need an adjustable steel prop for your construction project, BM211 offers the perfect solution. Our steel props are made of durable materials and are adjustable for different heights. We also offer competitive prices and fast delivery times. Get in touch with us to learn more about our steel props and get the best steel props price for your project.

Customization:

Adjustable Steel Prop
