hot dip galvanzied ringlock System Performance Scaffold Coupler System

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Shipping Origin: China
- Material: Q235 Steel
- Warranty: 2 Years
- Product Name: Ringlock System
- Application Scenarios: Architecture
- Surface Treatment: Hot-dip Galvanized

Product Description

Product Description:

Product Overview: Ringlock System Scaffolding

The Ringlock System Scaffolding is a versatile and reliable scaffolding system that is designed to meet the needs of various construction projects. It is made of high-quality Q235 steel and has a hot-dip galvanized surface treatment, ensuring durability and longevity. The product is suitable for use in architecture and other construction scenarios, making it an essential tool for any building project.

Advantages

The Ringlock System Scaffolding is a highly efficient and cost-effective solution for construction projects. Its unique design and high-quality materials make it a superior alternative to traditional scaffolding systems. The following are some of its key advantages:

Easy Installation: The Ringlock System uses a layher scaffolding design, which allows for quick and easy assembly. Its modular components and rosette connection system make it easy to set up and adjust to fit any project.

High Load Capacity: The Q235 steel used in the construction of the Ringlock System provides excellent strength and load-bearing capacity. This makes it suitable for supporting heavy loads and ensuring the safety of workers.

Versatility: The modular design of the Ringlock System allows for adaptability to various construction scenarios. It can be used for both vertical and horizontal structures, making it suitable for a wide range of applications.

Durability: With its hot-dip galvanized surface treatment, the Ringlock System is resistant to corrosion and rust. This ensures its longevity and makes it suitable for use in both indoor and outdoor environments.

Overall, the Ringlock System Scaffolding is a reliable and efficient choice for any construction project. Its innovative design, high load capacity, and durability make it a preferred option for contractors and builders. Invest in this Easy Installation Scaffold System and experience the benefits of modular scaffolding for your next construction project.

Technical Parameters:

Product Name	Ringlock System
Material	Q235 Steel
Surface Treatment	Hot-dip Galvanized
Application Scenarios	Architecture
Shipping Origin	China
Warranty	2 Years

Innovative Features	Innovative Ring Lock Design
Cost-effectiveness	Cost-Effective Ring Lock System
Usage	Used for all types of construction projects and applications
Advantages	Easy to assemble and disassemble, high load-bearing capacity, versatile and flexible, safe and stable
Compatibility	Compatible with Layher scaffolding and other standard scaffolding systems

Applications:

Welcome to Bythai Ringlock System Scaffolding

Bythai BM202 Ringlock System Scaffolding is a versatile, durable and efficient scaffolding solution suitable for a wide range of construction projects. With our commitment to quality, we have obtained SGS certification, ensuring that our products meet international standards. Our scaffolding system is designed to provide safe and reliable support for construction workers, making it an essential tool for any architecture project.

Application Scenarios

Bythai Ringlock System Scaffolding is suitable for various construction projects, including:

High-rise buildings

Bridges and overpasses

Tunnels

Stadiums and arenas

Industrial facilities

And many more

Our scaffolding system is designed to provide a safe and stable working platform for construction workers in any type of environment, making it an essential tool for any architecture project.

Product Name: Ringlock System

The Ringlock System, also known as the Scaffold Coupler System, is a revolutionary scaffolding solution that offers flexibility, strength, and durability. It consists of modular components that can be easily assembled and disassembled, making it a versatile and efficient scaffolding system for any construction project.

Brand Name: Bythai

Bythai is a leading manufacturer of high-quality scaffolding products in China. We are committed to providing our customers with the best products and services, and our Ringlock System Scaffolding is no exception. Our brand has gained a reputation for its superior quality, reliability, and affordability.
Model Number: BM202

The BM202 model is a popular choice among our customers due to its versatility and durability. It is suitable for a wide range of construction projects and can be easily customized to meet specific project requirements.
Place of Origin: China

All our scaffolding products, including the Ringlock System, are proudly made in China. We have a state-of-the-art manufacturing facility equipped with the latest technology and a team of skilled professionals dedicated to producing high-quality scaffolding products.
Certification: SGS

Bythai Ringlock System Scaffolding has been tested and certified by SGS, a globally recognized certification body. This ensures that our products meet international standards for safety, quality, and durability.
Price: 4.5-8.5

We offer competitive prices for our Ringlock System Scaffolding, making it an affordable option for construction projects of all sizes. Our prices may vary depending on the quantity ordered, customization requirements, and delivery location.
Packaging Details: In bundles

Our Ringlock System Scaffolding is packaged in bundles to ensure safe transport and easy handling. We can also provide customized packaging solutions to meet specific project requirements.
Delivery Time: 10-15

We understand the importance of timely delivery, and we strive to meet our customers' deadlines. Our standard delivery time for the Ringlock System Scaffolding is 10-15 days, but we can also accommodate urgent orders upon request.
Payment Terms: TT/TC

We offer flexible payment options to our customers, including Telegraphic Transfer (TT) and Tele Credit (TC). Our team will work closely with you to find the most convenient payment method for your order.
Surface Treatment: Hot-dip Galvanized

Our Ringlock System Scaffolding is hot-dip galvanized to provide superior protection against corrosion and ensure long-lasting durability. This surface treatment also makes our scaffolding system suitable for use in various weather conditions.
Warranty: 2 Years

We stand behind the quality of our products, and that's why we offer a 2-year warranty for our Ringlock System Scaffolding. In the unlikely event of any defects or issues, our team will work with you to find a satisfactory solution.
Shipping Origin: China

We ship our Ringlock System Scaffolding from our manufacturing facility in China to any location worldwide. We work with reliable shipping partners to ensure timely and safe delivery of our products.
Conclusion

Bythai BM202 Ringlock System Scaffolding is a high-quality, versatile, and affordable scaffolding solution suitable for a wide range of construction projects. With our commitment to quality, SGS certification, and timely delivery, we are the go-to choice for scaffolding needs in the architecture industry. Contact us today to learn more about our products and services.

Customization:

Bythai Ringlock System Scaffolding - Customized Service

Brand Name: Bythai
Model Number: BM202
Place of Origin: China
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15 days
Payment Terms: TT/TC
Warranty: 2 Years
Material: Q235 Steel
Product Name: Ringlock System Scaffolding
Shipping Origin: China
Application Scenarios: Architecture
Customized Service Features:

Hot Dip Galvanized Ringlock for enhanced durability and corrosion resistance

Compliant with International Scaffolding Standards for safety and quality assurance

Customized design options available to meet specific project requirements

Packing and Shipping:

Packaging and Shipping

Ringlock System Scaffolding is carefully packaged and shipped to ensure its safe arrival and easy installation.
Packaging

The scaffolding components are first wrapped in protective materials to prevent any damage during transportation. Then, they are placed in sturdy wooden crates to provide further protection. Each crate is labeled with the product name, size, and quantity for easy identification and organization.
Shipping

We offer a variety of shipping options to suit your needs and budget. Our standard shipping method is by sea, which allows for cost-effective transportation of large quantities. We also offer air and land shipping for urgent or smaller orders.
Our shipping team carefully loads the crates onto the shipping vessel or vehicle, ensuring they are secured and protected for the journey. We also provide tracking information so you can monitor your shipment's progress and estimated delivery date.
Upon arrival, our scaffolding can be easily unloaded and assembled with the help of our detailed installation instructions. We are committed to providing a hassle-free and efficient shipping process for our customers.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Bythai.

Q: Where is this product made?

A: This product is made in China.

Q: Is this product certified?

A: Yes, this product is certified by SGS.

Q: What is the price range for this product?

A: The price range for this product is 4.5-8.5.
