Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM205
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Size: Customized
- Material: Q235
- Load Capacity: High
- Arrival Time: 10-15
- Color: Steel/Spray Plastic
- Shipping Origin: China

Product Description

Product Description:

Frame System Scaffolding: The Ultimate Solution for Your Construction Needs

Are you tired of struggling with traditional scaffolding systems that are heavy, difficult to install, and lack versatility? Look no further, because Frame System Scaffolding is here to revolutionize the way you approach construction projects.

Product Overview

Frame System Scaffolding is a state-of-the-art scaffolding system that is designed to provide a safe, efficient, and cost-effective solution for all your construction needs. This system is perfect for a wide range of applications, including building construction, maintenance, and repair work.

Key Features and Benefits

With its arrival time of 10-15 days and convenient shipping origin from China, Frame System Scaffolding is a highly efficient and time-saving solution. But that's not all, here are some of the other key features and benefits that make it stand out from traditional scaffolding systems:

Light Weight and High Strength

The Frame System Scaffolding is made from high-quality steel that is both lightweight and strong. This makes it easy to handle and transport, while also providing a high load capacity, making it suitable for even the most demanding construction projects.

Easy to Install

With its innovative design and user-friendly features, the Frame System Scaffolding is incredibly easy to install. This not only saves you time and effort but also reduces the risk of accidents and injuries during the installation process.

Adjustable Height

The h scaffold system of the Frame System Scaffolding allows for easy adjustment of the height, making it suitable for a variety of construction projects. Whether you need to work on a low-rise or a high-rise building, this scaffolding system has got you covered.

Durable and Versatile

The Frame System Scaffolding is built to last. Made from high-quality materials and with precision engineering, this system is durable and can withstand even the toughest working conditions. Additionally, its versatile design allows for use in a wide range of applications, making it a valuable investment for any construction project.

Customizable Size

At Frame System Scaffolding, we understand that every construction project is unique and requires specific solutions. That's why we offer customized sizes for our scaffolding system, ensuring that it meets the specific requirements of your project.

Cost-Effective

With its high load capacity, durability, and customizable size, the Frame System Scaffolding offers a cost-effective solution for your construction needs. Its versatility and ease of installation also help to save time and labor costs, making it a wise choice for any construction project.

Portal Frame Scaffold Accessories

In addition to the main scaffolding system, we also offer a range of portal frame scaffold accessories to enhance the functionality and safety of your construction project. These accessories include safety rails, toe boards, outriggers, and more, all designed to work seamlessly with the Frame System Scaffolding.

Experience the Difference with Frame System Scaffolding

In conclusion, the Frame System Scaffolding is a revolutionary product that is set to transform the way you approach construction projects. With its innovative design, customizable size, and high load capacity, this system offers a safe, efficient, and cost-effective solution for all your construction needs. Don't settle for traditional scaffolding systems, upgrade to Frame System Scaffolding today!

Technical Parameters:

Product Name	American Frame System Scaffolding
Material	Q235 Steel
Load Capacity	High
Size	Customized
Color	Steel/Spray Plastic
Arrival Time	10-15 Days
Shipping Origin	China
Product Type	Scaffold Frame System

Features	<ul style="list-style-type: none"> - Made from high quality Q235 steel for durability and strength - Can support heavy loads with high load capacity - Customized sizes available to meet specific project requirements - Steel or spray plastic color options for versatility and protection - Designed for easy and efficient assembly and disassembly - Lightweight and compact for convenient transportation and storage - Ideal for a variety of construction and maintenance projects - Quick arrival time of 10-15 days - Shipping origin from China with reliable and efficient shipping options - Complies with American frame scaffolding standards for safety and quality assurance

Applications:

Bythai Frame System Scaffolding

Brand Name: Bythai

Model Number: BM205

Place of Origin: China

Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 10-15

Payment Terms: TT/TC

Shipping origin: China

Load Capacity: High

Color: Steel/Spray Plastic

Size: Customized

Arrival time: 10-15

One of the key features of the Bythai Frame System Scaffolding is its load capacity. With its high load capacity, it can support heavy loads, making it ideal for use in construction projects that require heavy equipment and materials.

The scaffolding frames are made of high-quality steel and can be coated with spray plastic for added protection against rust and corrosion. This ensures the durability and longevity of the product, making it a cost-effective investment for any construction or maintenance project.

The scaffolding system also comes with portal frame scaffold accessories, such as cross braces, guardrails, and planks, to enhance its stability and safety. These accessories are designed to fit perfectly with the scaffolding frames, making assembly quick and easy.

The Bythai Frame System Scaffolding is suitable for a wide range of applications, including building construction, bridge construction, industrial maintenance, and even home renovation projects. It is also highly versatile and can be used for both temporary and permanent structures.

When it comes to shipping and delivery, the Bythai Frame System Scaffolding is shipped from China and can be delivered within 10-15 days. The product is packaged in bundles, making it easy to transport and handle.

In terms of payment, Bythai offers flexible payment terms such as TT/TC, making it convenient for customers to purchase the scaffolding system. The price range for the product is 4.5-8.5, depending on the size and customization options.

In summary, the Bythai Frame System Scaffolding is a reliable, high-quality, and durable product that is perfect for various construction and maintenance projects. With its easy assembly, customizable size, and strong load capacity, it is a must-have for any construction site or project. Trust Bythai for all your scaffolding needs.

Packing and Shipping:

Frame System Scaffolding Packaging and Shipping

The Frame System Scaffolding is carefully packaged and shipped to ensure safe delivery and easy assembly for our customers.

Packaging

Each component of the Frame System Scaffolding is wrapped and secured in high-quality and durable packaging materials to protect against any damage during transportation. The packaging materials are also designed to withstand different weather conditions and prevent any corrosion or rusting of the scaffolding.

Clear labeling is included on each package to easily identify the contents and corresponding assembly instructions.

Shipping

We offer a variety of shipping options to best suit our customers' needs. Our products can be shipped domestically or internationally, with both air and sea freight available.

Our shipping team carefully loads and secures the packages onto the transportation vehicle to ensure safe and efficient delivery. We also provide tracking information so customers can monitor their shipment's progress.

For international shipments, we handle all necessary customs and documentation to ensure a smooth delivery process.

Assembly

The Frame System Scaffolding is designed for easy and quick assembly. Detailed instructions are included with each package, and our customer service team is available to assist with any questions or concerns.

Once assembled, the scaffolding can easily be disassembled and packed back into its original packaging for convenient storage and transportation.
