Product Description

Product Description:

Scaffolding Coupler - Japanese Steel Pipe Connectors

This Scaffolding Coupler is a must-have tool for any construction or maintenance project. Made from high-quality Japanese steel, it is designed to provide a strong and secure connection between scaffolding pipes. With its galvanized surface treatment, it ensures long-lasting durability and resistance to corrosion.
The silver color of this coupler adds a professional touch to any scaffolding structure. It is not only functional, but also aesthetically pleasing, making it a perfect choice for any project.
Product Details:

Name: Scaffolding Coupler

Standard: BS EN74-1

Surface Treatment: Galvanized

Color: Silver

MOQ: 1000 pieces

This Scaffolding Coupler meets the international standard of BS EN74-1, ensuring its quality and safety. It is designed to fit any scaffolding pipes with ease, providing a stable and secure connection.
With a minimum order quantity of 1000 pieces, this product is suitable for both small and large-scale projects. It is perfect for construction companies, maintenance teams, and individuals who are in need of high-quality scaffolding accessories.
Why Choose Our Scaffolding Coupler?

Made from high-quality Japanese steel for superior strength and durability

Galvanized surface treatment for long-lasting resistance to corrosion

Meets the international standard of BS EN74-1 for quality and safety assurance

Silver color adds a professional touch to any scaffolding structure

Suitable for both small and large-scale projects with a MOQ of 1000 pieces

In conclusion, our Scaffolding Coupler is a reliable and essential tool for any construction or maintenance project. Its high-quality materials and superior design make it a must-have for scaffolding structures. Order now and experience the convenience and safety of using our Japanese Steel Pipe Connectors.

Feature: **High Strength**

Product Description

The Scaffolding Coupler is a high-quality Japanese scaffold accessory used in construction projects. Made of Japanese steel, this coupler is known for its durability and strength. With its model number BM201, it is easy to identify and locate in large construction sites. Its place of origin is China Tianjin, where it is manufactured to meet the highest standards of quality and safety. It has also been certified by SGS, ensuring that it meets all necessary requirements for use in construction projects.
With a price range of $4.5-8.5, the Scaffolding Coupler is an affordable yet reliable choice for scaffolding needs. It is packaged in bundles for easy transportation and storage, and can be delivered within 15-25 days after order confirmation.
The payment terms for this product are TT/TC, making it convenient for customers to make transactions. It also meets the standard of EN74-1, ensuring its compatibility with other scaffolding equipment.
The Scaffolding Coupler comes in a sleek silver color, adding a professional touch to any construction site. Its application is specifically for construction purposes, making it an essential tool for building and renovation projects.
With a minimum order quantity of 1000 pieces, the Scaffolding Coupler is perfect for large-scale construction projects. Its high strength feature makes it a reliable choice for heavy-duty use, providing a secure and stable connection between scaffolding pipes.

Product Benefits

Made of high-quality Japanese steel for durability and strength.

Comes with a model number for easy identification.

Manufactured in China Tianjin to meet high standards of quality and safety.

Certified by SGS for assurance of quality and safety.

Affordable price range of $4.5-8.5 for cost-effective solutions.

Packaged in bundles for easy transportation and storage.

Fast delivery within 15-25 days after order confirmation.

Convenient payment terms of TT/TC.

Meets the standard of EN74-1 for compatibility with other scaffolding equipment.

Sleek silver color for a professional look on construction sites.

Specifically designed for construction purposes.

High strength feature for secure and stable connections between scaffolding pipes.

Perfect for large-scale construction projects with a MOQ of 1000 pieces.

Application and Usage

The Scaffolding Coupler is used in various construction projects, such as building construction, renovation, and maintenance. It is used to connect scaffolding pipes, providing a stable and secure support system for workers and equipment.
To use the Scaffolding Coupler, simply insert the ends of two scaffolding pipes into the coupler and tighten the bolts using a wrench. This will create a strong and stable connection between the pipes, allowing them to support heavy loads.
The high strength feature of the Scaffolding Coupler makes it suitable for use in different types of scaffolding systems, such as ringlock, cuplock, and frame scaffolding. It is also compatible with different sizes of scaffolding pipes, making it a versatile choice for construction projects.

Why Choose Scaffolding Coupler?

There are many reasons to choose the Scaffolding Coupler for your construction projects:

High-quality Japanese scaffold accessory for durability and strength.

Certified by SGS for quality and safety assurance.

Easy to identify with its model number.

Compatible with different types and sizes of scaffolding systems.

Affordable price range for cost-effective solutions.

Sleek silver color for a professional look on construction sites.

Convenient payment terms for easy transactions.

Fast delivery within 15-25 days after order confirmation.

High strength feature for secure and stable connections between scaffolding pipes.

Perfect for large-scale construction projects with a MOQ of 1000 pieces.

Conclusion

The Scaffolding Coupler is a high-quality Japanese scaffold accessory that offers durability, strength, and compatibility for various construction projects. With its affordable price range, convenient payment terms, and fast delivery time, it is a cost-effective and reliable choice for scaffolding needs. Its high strength feature and compatibility with different scaffolding systems make it a versatile and essential tool for construction sites. Choose the Scaffolding Coupler for your next construction project and experience its high-quality and superior performance.

Customization:

Scaffolding Coupler - Customized Services

Brand Name: Scaffolding Coupler
Model Number: BM201
Place of Origin: China Tianjin
Certification: SGS
