Product Description

Product Description:

Scaffolding Plank

The Scaffolding Plank is a high-quality steel frame designed for scaffolding construction. It is a versatile and essential component used for various construction projects. The plank is available in customized lengths to meet the specific needs of different construction sites. It can be shipped from China, making it easily accessible to customers all over the world.

The Scaffolding Plank is designed to provide a safe and stable working platform for workers at elevated heights. It is made from durable steel, ensuring its strength and longevity. The plank can withstand heavy loads and is suitable for use in both residential and commercial construction projects.

One of the key features of the Scaffolding Plank is its surface options. It comes in three different surface finishes - Pre-galvanized, hot dip galvanized, and spray plastic. The Pre-galvanized surface provides a protective layer against rust and corrosion, making it suitable for outdoor use. The hot dip galvanized surface offers superior protection against harsh weather conditions, making it ideal for long-term projects. The spray plastic surface provides a smooth and non-slip surface, ensuring the safety of workers while working on the plank.

The Scaffolding Plank is also available in a perforated design, making it lightweight and easy to handle. The perforated holes on the plank allow for better ventilation, reducing the risk of accidents caused by slipping or tripping due to accumulated water or debris. This feature makes the plank more suitable for use in humid or wet environments.

When it comes to packaging, the Scaffolding Plank is shipped in containers, ensuring its safe and secure delivery to the customer. The container packaging also makes it convenient for transportation and storage, especially for large orders.

Length: Customized to meet specific project requirements.

Place of Shipment: China, providing easy access to customers worldwide.

Usage: Designed for scaffolding construction, providing a safe and stable working platform for workers at elevated heights.

Packaging: Shipped in containers for safe and convenient transportation and storage.

Surface: Available in Pre-galvanized, hot dip galvanized, and spray plastic finishes, providing protection against rust, corrosion, and non-slip surface for worker safety.

Key Words: Steel frame for decking plank, scaffolding steel plank, perforated steel plank for sale, scaffolding steel walkboard.

Features:

Product Name: Scaffolding Plank
Usage: Scaffolding
Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
Packaging: Container
Length: Customized
Place of shipment: China
Material: Galvanized Steel
Type: Steel Plank
Application: Scaffolding Catwalk
Features: High Strength, Corrosion Resistant
Surface Treatment: Pre-galvanized, Hot-dip Galvanized, Spray Plastic
Customization Options: Length, Surface Treatment, Packaging
Packaging: Container
Shipment: From China to Worldwide

Applications:

Bythai BM205 Scaffolding Plank

Brand Name: Bythai
Model Number: BM205
Place of Origin: China
Minimum Order Quantity: 1000
Price: $4.5-8.5 per piece
Packaging Details: In bundles
Delivery Time: 10-15 days
Payment Terms: Container, Shipping
Packaging: Container
Usage: Scaffolding
Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
Length: Customized
Place of Shipment: China
Product Description

The Bythai BM205 Scaffolding Plank is a high-quality steel plank designed for use in scaffolding systems on construction sites. It is made from galvanized steel, making it strong, durable, and resistant to rust and corrosion. The plank comes equipped with hooks on both ends, allowing for easy and secure attachment to scaffolding frames.
Application

The Bythai BM205 Scaffolding Plank is ideal for various applications on construction sites, such as providing a safe working platform for

workers, supporting heavy loads, and creating walkways and bridges. It can also be used for temporary structures, such as stages and platforms, at events and concerts.

Features

High-quality galvanized steel for strength and durability

Easy attachment to scaffolding frames with hooks on both ends

Customizable length to fit different construction needs

Pre-galvanized, hot dip galvanized, or spray plastic surface options for added protection

Suitable for use in various construction environments

Advantages

The Bythai BM205 Scaffolding Plank offers many advantages for construction sites:

Provides a safe and stable working platform for workers

Supports heavy loads and equipment

Easy to install and remove

Durable and long-lasting

Can be reused for multiple construction projects

Customizable length allows for flexibility and versatility

Various surface options for added protection and customization

Affordable and cost-effective

Customization

The Bythai BM205 Scaffolding Plank can be customized according to specific project requirements. Length, surface finish, and packaging can all be tailored to meet the needs of different construction sites and projects.

Packaging and Delivery

The planks are packaged in bundles and shipped in containers from China. With a minimum order quantity of 1000 pieces, the delivery time is 10-15 days depending on the order size and customization options.

Conclusion

The Bythai BM205 Scaffolding Plank is a top-of-the-line product that offers safety, durability, and customization for construction sites. With its high-quality materials and customizable options, it is a reliable and cost-effective solution for scaffolding and temporary structures. Trust Bythai for all your scaffolding needs.

Customize Your Scaffolding Planks with Bythai

At Bythai, we understand that every construction project is unique and requires specific equipment to ensure safety and efficiency. That's why we offer a comprehensive customization service for our steel plank ringlock scaffolding, including our scaffolding steel walking planks hook, pierced steel planking, and scaffolding platform planks.
With our customization service, you can select the length of your planks to fit your specific scaffolding needs. Our skilled team will work with you to provide the perfect size and quantity of scaffolding planks for your project.
Whether you need a large order of 1000 planks or a smaller quantity, we are here to meet your needs. Our prices range from 4.5-8.5 depending on the customization and quantity of your order.
Your safety is our top priority, which is why we use high-quality steel material for our scaffolding planks. Our products are made in China and undergo strict quality control measures to ensure durability and reliability.
Our packaging is designed to keep your planks safe during transportation. We package our planks in bundles and use containers for shipment to ensure they arrive in perfect condition.
Don't settle for generic scaffolding planks, trust Bythai to provide customized solutions for your scaffolding needs. Contact us today to place your order and let us help you make your construction project a success.

Packing and Shipping:

Packaging and Shipping:

The scaffolding plank will be packaged in a sturdy and durable cardboard box, ensuring that the product is protected during shipping and handling. The box will be labeled with the product name, dimensions, and weight for easy identification.
To further secure the product during transportation, the box will be sealed with heavy-duty packing tape. Inside the box, the scaffolding plank will be wrapped in bubble wrap to provide additional cushioning and protection.
Depending on the quantity ordered, the boxes will either be stacked on a pallet or placed in a larger shipping container. This will ensure that the product is not damaged during transit and can be easily transported to its destination.
For domestic shipping, we will use a trusted and reliable courier service to deliver the product to the customer's desired location. For international shipping, we will use a reputable freight forwarding company to ensure timely and secure delivery.

Our packaging and shipping process is designed to ensure that the scaffolding plank arrives at its destination in perfect condition, ready to be used for construction or other applications.
