## Product Description

# Product Description:

Scaffolding Plank - Your Essential Scaffolding Material

Scaffolding plank, also known as a steel plank or catwalk scaffold, is an essential component in the construction industry. It is used to create a safe and sturdy platform for workers to stand on while working at heights. Our scaffolding plank is made of high-quality steel and is suitable for a wide range of construction projects.
Packaging: Container

Our scaffolding plank is packaged in a container to ensure its safety during transportation. This container is designed to protect the plank from any damage that may occur during shipping. It also makes it easy to store and transport the planks to your construction site.
Usage: Scaffolding

Scaffolding plank is mainly used for scaffolding, which is a temporary structure used to support workers and materials during construction, maintenance, or repair work. Our scaffolding plank is strong, durable, and easy to install, making it the perfect choice for any scaffolding project.
Material: Steel

Our scaffolding plank is made of high-quality steel, which is known for its strength and durability. This makes our plank capable of withstanding heavy loads and extreme weather conditions. The use of steel also ensures that our scaffolding plank is long-lasting, making it a cost-effective choice for your construction needs.
Length: Customized

We understand that every construction project is different, which is why we offer customized lengths for our scaffolding plank. This allows you to choose the perfect length for your specific scaffolding needs, ensuring maximum safety and efficiency on your construction site.
Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

Our scaffolding plank is available in three surface options: pre-galvanized, hot dip galvanized, and spray plastic. Pre-galvanized planks are coated with a layer of zinc for added protection against rust and corrosion. Hot dip galvanized planks undergo a process where they are dipped in molten zinc, making them highly resistant to corrosion. Spray plastic planks are coated with a layer of plastic, providing a durable and non-slip surface for workers.
Choose the surface option that best suits your needs and rest assured that our scaffolding plank will provide a safe and secure platform for your workers.
Conclusion

In conclusion, our scaffolding plank is an essential product for any construction project. With its strong and durable steel material, customized length options, and various surface choices, it is the perfect choice for scaffolding needs. Trust our scaffolding plank to provide the safety and stability required for your construction projects.

## Features:

Product Name: Scaffolding Plank
Usage: Scaffolding
Place of shipment: China
Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
Length: Customized

Material: Steel

Steel plank for scaffold

Pierced steel planking

Steel plank ringlock scaffold

## Applications:

Scaffolding Plank - Bythai

Brand Name: Bythai
Model Number: BM205
Place of Origin: China
Minimum Order Quantity: 1000
Price: $4.5-$8.5 per piece
Packaging Details: In bundles
Delivery Time: 10-15 days
Payment Terms: Container, shipping
Length: Customized
Usage: Scaffolding
Material: Steel
Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
Packaging: Container
The Scaffolding Plank by Bythai is a high-quality and durable steel plank scaffold, designed and manufactured in China. It is available in model number BM205 and can be customized in length according to the customer's needs. With a minimum order quantity of 1000, this product is perfect for large construction projects.
The steel scaffolding plank is made of strong and sturdy steel, ensuring safety and stability while working at height. It is designed with hooks on both ends, providing a secure and stable connection between the planks and the scaffolding.
This product is suitable for various applications, such as building construction, bridge construction, and maintenance work. It is also commonly used in industries such as oil and gas, petrochemical, and power plants.
The surface of the steel plank can be pre-galvanized, hot dip galvanized, or spray plastic, depending on the customer's preference. This ensures that the product is protected from rust and corrosion, making it long-lasting and ideal for outdoor use.
The packaging of the scaffolding plank is carefully done in bundles, making it easy to transport and store. It can also be packed in containers for convenient shipping. The delivery time for this product is 10-15 days, making it a quick and efficient solution for any construction project.
With Bythai's Scaffolding Plank, customers can expect high-quality and reliable products at competitive prices. Whether it's for a large-scale construction project or a small-scale maintenance job, this product is the perfect choice for any scaffolding needs.

## Customization:

Customized Service for Scaffolding Plank - Bythai

Brand Name: Bythai
Model Number: BM205
Place of Origin: China
Minimum Order Quantity: 1000
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15
Payment Terms: container, shipping
Place of shipment: China
Usage: Scaffolding
Packaging: Container
Material: Steel
Length: Customized
Key Features:

Customized sizes and lengths available for steel plank

Galvanized steel plank catwalk for added durability and corrosion resistance

Steel frame available for decking plank to provide sturdy support

Scaffolding steel plank designed specifically for scaffolding use

Scaffolding board made from high-quality steel for increased safety and strength
Advantages of Bythai's Scaffolding Plank:

High-quality steel material used for maximum strength and durability

Customized sizes and lengths available to meet specific project needs

Galvanized steel plank catwalk for improved corrosion resistance

Steel frame available for decking plank to provide added support and stability

Scaffolding steel plank specifically designed for scaffolding use to ensure safety and efficiency

## Packing and Shipping:

Scaffolding Plank Packaging and Shipping

Packaging:

Our scaffolding planks are carefully packaged to ensure safe delivery to our customers. Each plank is wrapped in plastic and then securely bundled together into a stack. The stack is then placed into a sturdy cardboard box for added protection during transit.
We also offer customized packaging options for bulk orders, with planks shrink-wrapped onto pallets for efficient loading and unloading.
Shipping:

We offer both domestic and international shipping options for our scaffolding planks. Our domestic shipping partners include reputable carriers such as UPS, FedEx, and USPS. For international orders, we work with trusted freight forwarders to ensure timely and secure delivery.
We strive to process and ship all orders within 1-2 business days. Customers will receive a tracking number via email once their order has been shipped.
In order to ensure the safe arrival of our products, we carefully package and label each shipment with handling instructions and product information. Our team also conducts thorough quality checks before shipping to ensure that our customers receive only the best quality scaffolding planks.
