- Highlight: **HDG Coating Scaffolding Climbing Platforms, HDG Coating Scaffold Platform Ladder, Scaffold Platform Ladder**

Scaffolding Climbing Platforms HDG Coating For Durability Scaffold Platform Ladder

Product Description:

Scaffolding Ladders

Scaffolding Ladders are essential tools for any construction or renovation project. They provide a safe and sturdy platform for workers to access different levels of a building or structure. Our Scaffolding Portable Ladders are designed for convenience and ease of use, making them a must-have for any construction site.

With a ladder with hook feature, our Scaffolding Ladders can easily be attached to the scaffolding structure, providing a stable and secure platform for workers to climb on. This ladder with hook design also allows for easy portability, making it convenient to move and use in different areas of the construction site.

Our Scaffolding Ladders are made with high-quality materials to ensure durability and safety. The ladder is available in two materials, aluminum and HDG, giving you the option to choose the best fit for your project. The aluminum ladder is lightweight and easy to carry, while the HDG ladder is more heavy-duty and can withstand harsh weather conditions.

Material	Size	Step Height	Step Width	Surface Treatment
Aluminum	3m	30cm	50cm	None
HDG	3m	30cm	50cm	HDG

The 3m size of our Scaffolding Ladders is perfect for reaching heights up to 3m, providing a safe and stable platform for workers to access higher levels. The step height of 30cm and step width of 50cm allow for comfortable and secure footing while climbing the ladder. The HDG surface treatment of our Scaffolding Ladders provides protection against rust and corrosion, ensuring the longevity and durability of the ladder. This makes it suitable for use in outdoor construction sites where the ladder may be exposed to harsh weather conditions.

In summary, our Scaffolding Ladders are essential tools for any construction site, providing convenience, safety, and durability. With the option to choose between the lightweight aluminum ladder or heavy-duty HDG ladder, you can find the perfect fit for your project. Invest in our Scaffolding Ladders today and make your construction or renovation project a success.

Technical Parameters:

Step Height: 30cm
Overview

Scaffolding Ladders are an essential tool for construction and industrial projects. These ladders provide a safe and efficient way for workers to access elevated areas, making it easier to complete tasks such as painting, plastering, and maintenance work.
Product Description

The Scaffolding Ladders from bythai are designed to provide stability and durability in any scaffolding setup. These ladders are made from high-quality aluminum or hot-dip galvanized steel, ensuring they can withstand heavy loads and harsh weather conditions. The

ladder is equipped with a non-slip step and a handrail for added safety, making it suitable for use in various environments.

Application and Usage

The Scaffolding Ladders are perfect for any scaffolding mounting system. They can be easily attached to the scaffolding frames without the need for additional hooks, making it a convenient and time-saving solution. These ladders are also portable, making them ideal for use in different locations within a project site.

Features and Benefits

Strong and durable construction

Non-slip steps and handrail for safety

Easy to attach to scaffolding frames

Portable and versatile

Available in silver color

Can withstand up to 150kg load capacity

Suitable for various construction and industrial projects

Can be used as a standalone ladder

Available in different step heights and widths to fit different scaffolding setups

Ordering and Delivery

The minimum order quantity for the Scaffolding Ladders is 1000 units. They are packed in containers for safe transportation and can be delivered within 10-25 days after placing an order. Customers can choose between aluminum or hot-dip galvanized steel material, as well as different step heights and widths to meet their specific needs.

Conclusion

In summary, the Scaffolding Ladders from bythai are a reliable and convenient solution for accessing elevated areas in construction and industrial projects. With its strong and durable construction, safety features, and portability, these ladders are a must-have for any scaffolding setup. Place your order now and experience the ease and efficiency of using our Scaffolding Ladders.
