

Q235 Steel / Spray Plastic Frame System Scaffolding Adaptadores De Arpas

Basic Information

- Place of Origin:
- Brand Name:
- Certification: SGS
- Model Number: BM205
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

Color:	Steel/Spray Plastic
Material:	Q235
Arrival Time:	10-15
• Size:	Customized
Shipping Origin:	China
Load Capacity:	High
Highlight:	Spray Plastic Frame System Scaffolding, Customized Q235 Frame System Scaffolding

China

Bythai

Product Description:

Frame System Scaffolding

Portal Frame Scaffolding, also known as frame scaffolding system, is an essential tool for construction projects. It provides a safe and efficient way to access elevated areas for workers, as well as a stable platform for materials and equipment. Our Frame System Scaffolding is made of high-quality Q235 steel, ensuring its durability and strength to withstand heavy loads. It is designed to be customizable in size, making it suitable for various construction needs and projects.

Product Specifications

Load Capacity: With its sturdy Q235 steel construction, our Frame System Scaffolding has a high load capacity, making it suitable for heavy-duty tasks.

Size: The size of our scaffolding frame system can be customized according to the specific needs of your project. This ensures maximum efficiency and safety.

Shipping Origin: Our Frame System Scaffolding is manufactured in China, where we have strict quality control measures in place to ensure the highest quality product for our customers.

Arrival Time: We understand the importance of timely delivery for construction projects. Our scaffolding frame system can be shipped to your location within 10-15 days, ensuring that your project stays on track.

Material: Made of Q235 steel, our Frame System Scaffolding is known for its strength, durability, and resistance to corrosion, making it suitable for long-term use.

Key Features

Easy to assemble and disassemble, saving time and labor costs.

Adjustable height and width, making it suitable for different construction needs.

Stable and secure platform for workers and materials, ensuring safety on the job site.

Lightweight and portable, making it easy to move and transport to different locations.

Compatible with various accessories, such as planks, ladders, and guardrails, for added convenience and safety.

Cost-effective and long-lasting solution for construction projects.

Conclusion

In summary, our Frame System Scaffolding is a high-quality, customizable, and efficient solution for construction projects. With its high load capacity, customizable size, and timely delivery, it is the ideal choice for your scaffolding needs. Trust in our product to provide a safe and stable working platform for your construction projects.
