

## Spray Plastic Q235 Steel Frame System Scaffolding For Customized Construction Needs

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS,ISO
- Model Number: BM205
- Minimum Order Quantity: 100
- Price: 4.5-8.5
- Packaging Details: CONTAINER
- Delivery Time: 10-15
- Payment Terms: TT/TC

### Product Specification

- Shipping Origin: China
- Load Capacity: High
- Arrival Time: 10-15
- Size: Customized
- Material: Q235
- Color: Steel/Spray Plastic
- Highlight: **Construction Q235 Frame System Scaffolding, Q235 Steel Scaffold Frame, Customized Ladder Frame Scaffolding**

## Product Description

### Spray Plastic Q235 Steel Frame System Scaffolding For Customized Construction Needs

#### Product Description:

##### Frame System Scaffolding

Frame System Scaffolding is a versatile and efficient solution for construction, maintenance, and renovation projects. Made from high-quality Q235 steel, this scaffolding is strong, durable, and can be customized to fit any job site.

With its innovative design and lightweight materials, our h frame scaffolding is easy to assemble and dismantle, making it the ideal choice for any project that requires frequent movement or adjustment.

The Portal Frame Scaffold Beams are designed to provide maximum stability and load-bearing capacity, ensuring the safety of workers and the success of any project. The beams are made from the same high-quality Q235 steel and are available in different sizes to meet the specific needs of your project.

##### Customized Size

One of the key features of our Frame System Scaffolding is its ability to be customized to fit any job site. Whether you need a small, compact scaffolding system for a tight space or a large, multi-level structure, our team can work with you to design and build a scaffolding system that meets your exact specifications.

##### High Load Capacity

Our scaffolding is designed with safety and efficiency in mind. The Q235 steel material and sturdy construction of our h frame and Portal Frame Scaffold Beams allow for a high load capacity, making it suitable for heavy-duty projects. You can trust our scaffolding to support your workers and equipment, even in the most challenging environments.

##### Easy to Assemble

We understand that time is of the essence in any construction project. That's why our Frame System Scaffolding is designed for quick and easy assembly. The lightweight materials and simple design allow for a hassle-free setup, minimizing downtime and maximizing productivity.

##### Durable

Made from high-quality Q235 steel and finished with a steel or spray plastic coating, our scaffolding is built to withstand the rigors of any job site. It can withstand harsh weather conditions and heavy use, ensuring it will last for years to come.

##### Shipping Origin: China

Our Frame System Scaffolding is proudly made in China, known for its high-quality manufacturing and competitive pricing. This allows us to offer our customers a top-notch product at a competitive price point, making it a smart investment for any project.

##### Color Options: Steel or Spray Plastic

We offer two color options for our scaffolding: steel or spray plastic. The steel coating provides a classic, industrial look, while the spray plastic coating offers a more modern and sleek appearance. Whichever option you choose, both offer the same level of durability and protection for your scaffolding.

## Features:

Product Name: Frame System Scaffolding

Size: Customized

Shipping origin: China

Color: Steel/Spray Plastic

Material: Q235

Arrival time: 10-15

Key Features:

Walk through scaffold system

H frame

H scaffold system

Ladder frame system

## Technical Parameters:

## Applications:

Bythai BM205 Frame System Scaffolding

The Bythai BM205 Frame System Scaffolding is a highly versatile and cost-effective product designed for temporary support and structural framing in construction sites, industrial sites, commercial sites, and large-scale projects. With its high load capacity, safe and reliable design, and ease of assembly, it is a popular choice among construction companies and contractors worldwide.

The BM205 scaffolding frame system is made of high-quality Q235 material and is available in both steel and spray plastic options. This ensures its durability and long-lasting performance, even in harsh working conditions. It is also certified by SGS, guaranteeing its quality and safety.

Product Features:

**Portal Frame Shoring System:** The BM205 is a portal frame system, meaning it has a rigid structure that provides strong support and stability. This makes it suitable for various applications, including formwork support, access scaffolding, and temporary structures.

**High Load Capacity:** With its robust structure and high-quality material, the BM205 can support heavy loads, making it suitable for large-scale projects and industrial sites.

**Safe and Reliable:** The scaffolding frame system is designed with safety in mind, and all components are carefully tested and inspected to ensure their reliability and stability.

**Easy to Assemble:** The BM205 is designed for easy assembly and disassembly, making it a time-saving and labor-saving solution. This also means it can be easily transported and used in various locations.

**Cost-effective:** The BM205 is a cost-effective solution compared to traditional scaffolding systems. Its versatility and ease of use can help reduce construction time and labor costs.

**Versatile:** The BM205 can be used for various applications, including supporting formwork, providing access for workers, and constructing temporary structures. It can also be used in different industries, such as construction, mining, and maintenance.

**Application Scenarios:**

The Bythai BM205 Frame System Scaffolding is suitable for the following scenarios:

**Construction sites:** The BM205 can be used to support formwork, provide access for workers, and construct temporary structures in construction sites of all sizes.

**Industrial sites:** With its high load capacity, the BM205 is suitable for industrial sites that require strong and reliable support structures, such as factories, power plants, and warehouses.

**Commercial sites:** The BM205 can be used in commercial sites, such as malls and office buildings, for construction, maintenance, and renovation work.

**Large-scale projects:** The BM205 is ideal for large-scale projects, such as bridges, tunnels, and high-rise buildings, where strong and versatile support structures are necessary.

**Packaging and Delivery:**

The BM205 is packaged in bundles, making it easy to transport and store. It has a delivery time of 10-15 days and can be shipped from China to any location worldwide. Payment terms can be arranged through TT or TC, and the product will arrive within 10-15 days after payment is received.

Overall, the Bythai BM205 Frame System Scaffolding is an efficient and reliable solution for temporary support and structural framing needs. Its high load capacity, safety features, ease of assembly, and versatility make it a must-have for any construction, industrial, or commercial site.
