Scaffolding Mobile Multipurpose Aluminum Scaffold Tower Platform 6061-T6

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM205
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Size: Customized
- Color: Steel/Spray Plastic
- Arrival Time: 10-15
- Material: Q235
- Shipping Origin: China
- Load Capacity: High
- Highlight: **Multipurpose Aluminum Scaffold Tower**, **6061-T6 Aluminum Mobile Tower**, **Multipurpose Aluminum Mobile Tower**

Product Description

Product Description:

Frame System Scaffolding - Product Overview

The Frame System Scaffolding is a high load capacity scaffolding system that is designed for quick and easy assembly and disassembly. It is commonly used in construction projects for supporting formwork, access and working platforms, and other temporary structures. With its sturdy and reliable design, this product provides a safe and efficient solution for working at height.

Key Features

Load Capacity: High

Arrival Time: 10-15 days

Material: Q235 Steel

Size: Customized

Shipping Origin: China

Product Description

The Frame System Scaffolding is a portal frame shoring system that consists of American frame, frame upright, frame ledger, scaffold coupler, and steel tubes. Each component is made of high-quality Q235 steel and is hot-dip galvanized for added durability and corrosion resistance. This ensures that the scaffolding can withstand heavy loads and harsh weather conditions, making it suitable for use in various construction projects.

Load Capacity

The Frame System Scaffolding has a high load capacity, making it suitable for supporting heavy loads and multiple workers at a time. This is achieved through its sturdy and reliable design, which includes thick steel tubing and secure connections between components.

Arrival Time

The Frame System Scaffolding can be delivered within 10-15 days after placing an order. This quick turnaround time allows for efficient planning and execution of construction projects, ensuring that there are no delays in the timeline.

Customized Size

The Frame System Scaffolding can be customized to fit the specific needs and requirements of each construction project. This allows for greater flexibility and adaptability, making it suitable for various construction environments and structures.

Shipping Origin

The Frame System Scaffolding is manufactured and shipped from China, ensuring that it meets international standards and is competitively priced. This also allows for efficient and cost-effective delivery options for customers around the world.

Conclusion

The Frame System Scaffolding is a reliable and efficient solution for working at height in construction projects. With its high load capacity, quick arrival time, customizable size, and durable materials, this product provides a safe and effective option for temporary structures and access platforms. Its portal frame shoring system design, American frame components, and hot-dip galvanized finish make it a top choice for construction companies around the world.

Features:

Product Name: Frame System Scaffolding
Material: Q235
Load Capacity: High
Size: Customized
Shipping origin: China
Arrival time: 10-15 days
Scaffolding frame system
American Frame design
Portal Frame Scaffolding

Technical Parameters:

Product Name	Frame System Scaffolding
Color	Steel/Spray Plastic
Arrival time	10-15 days
Load Capacity	High
Size	Customized
Shipping origin	China
Material	Q235
Key Features	Portal Frame Scaffold Beams, Portal Frame Scaffold Erection, Portal Frame Scaffold Accessories

Applications:

Introduction to Bythai Frame System Scaffolding BM205

Bythai Frame System Scaffolding BM205 is a highly durable and stable scaffolding system designed for various construction projects. It is manufactured in China and has been certified by SGS, ensuring its quality and safety. With a price range of $4.5-8.5, it offers a cost-effective solution for construction companies.
The scaffolding system consists of Scaffold Frame, Portal Frame Scaffold Beams, and other necessary components. It is designed to provide a safe and stable working platform for workers during construction, building maintenance, and renovation. Its versatile design makes it suitable for use in high-rise buildings, bridges, shipyards, and industrial plants.
Applications and Scenarios

The Bythai Frame System Scaffolding BM205 is the perfect solution for a wide range of construction projects. Its adjustable height feature makes it suitable for both low and high-rise buildings. It can be used for various purposes such as:
Building construction: The scaffolding system can be used to support workers and materials during the construction process, providing a safe and stable working platform.
Building maintenance: With its strong load capacity and stability, the scaffolding system is ideal for building maintenance tasks such as painting, cleaning, and repairs.
Renovation: During renovation projects, the scaffolding system can be used to provide a temporary working platform for workers, ensuring their safety and efficiency.
Bridges: The scaffolding system can be used for bridge construction and maintenance, providing a stable platform for workers to access hard-to-reach areas.
Shipyard: Its durability and stability make the scaffolding system suitable for use in shipyards, where workers need to access different parts of a ship for construction or maintenance.
Industrial plants: The scaffolding system can be used in industrial plants for maintenance, installation, and repair work, ensuring the safety of workers.
Key Features
The Bythai Frame System Scaffolding BM205 has the following key features:
Customizable size: The size of the scaffolding system can be adjusted according to the specific needs of the project.
High-quality material: Made of Q235 steel, the scaffolding system is strong and durable, ensuring its long lifespan.
Steel/spray plastic color: The scaffolding system is available in steel or spray plastic color, giving customers the option to choose according to their preference.
High load capacity: With its sturdy design, the scaffolding system has a high load capacity, making it suitable for heavy-duty tasks.
Safety and stability: The scaffolding system is designed to provide a safe and stable working platform, ensuring the safety of workers.
Adjustable height: The scaffolding system can be adjusted to different heights, making it suitable for various types of construction projects.
Packaging and Delivery
The Bythai Frame System Scaffolding BM205 is packaged in bundles and delivered to customers within 10-15 days after the order is placed. Customers can choose to pay through TT or TC, and the arrival time of the product is also 10-15 days.
Overall, the Bythai Frame System Scaffolding BM205 is a reliable and efficient solution for construction companies looking for a safe and stable scaffolding system. Its high-quality material, customizable size, and adjustable height make it suitable for various construction projects. With its affordable price range and prompt delivery, it is a popular choice among customers.

Customization:

Bythai BM205 Customized Service

Brand Name: Bythai
Model Number: BM205
Place of Origin: China
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15 days
Payment Terms: TT/TC
Color: Steel/Spray Plastic
Material: Q235
Load Capacity: High
Size: Customized
Shipping Origin: China
Our Frame System Scaffolding, also known as H frame or Portal Frame Scaffolding, offers a strong and stable structure for construction projects. As a renowned brand in the industry, Bythai is committed to providing top-quality scaffolding products with customized services to meet the specific needs of our clients.
With our BM205 model, made of high-quality Q235 steel, our scaffolding can withstand heavy loads and provide a safe and secure working platform. The steel material is also available in a spray plastic finish, offering durability and resistance to corrosion.
At Bythai, we understand the importance of customization in scaffolding solutions. That's why we offer a wide range of sizes and colors to choose from, allowing our clients to tailor the scaffolding to their specific project requirements. Our skilled engineers and designers will work closely with you to provide the best custom-made scaffolding solution that fits your needs and budget.
Rest assured, our products have been certified by SGS, ensuring the highest quality and safety standards. We also offer competitive prices starting from 4.5-8.5 per piece, with flexible payment terms of TT/TC for your convenience.
With our efficient packaging methods, the scaffolding will be delivered to you in bundles, making transportation and storage easy and convenient. Our delivery time is 10-15 days, ensuring timely completion of your project.
Choose Bythai for your next construction project and experience our reliable Frame System Structuring with outstanding Customized Service. Contact us now to get a quote and start building with confidence!
