

## EN74-1 Standard Galvanized Scaffolding Coupler High Strength Silver Construction Clamp

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

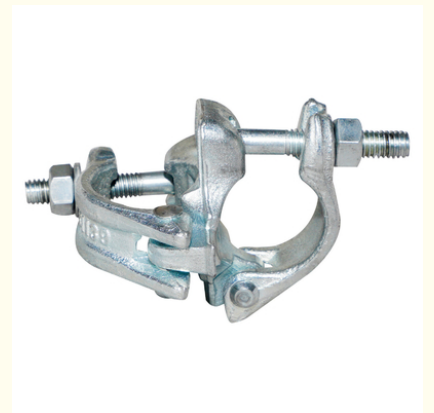

### Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 8.5-15.8
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

### Product Specification

- Surface Treatment: Galvanized
- Standard: EN74-1
- Color: Silver
- MOQ: 1000
- Name: Scaffolding Coupler
- Application: Construction
- Package: Container
- Feature: High Strength
- Highlight: **Silver Scaffolding Coupler,**  
**EN74-1 Scaffolding Coupler,**  
**Galvanized Scaffolding Coupler**

### Product Description:

The scaffolding coupler is an essential component in the construction industry, providing the necessary support and stability for scaffolding structures. This product, designed to meet the rigorous demands of building and maintenance work, ensures a safe and reliable framework for various construction projects. Our scaffolding coupler is not only functional but also adheres to the highest quality standards, incorporating features that make it stand out in a competitive market.

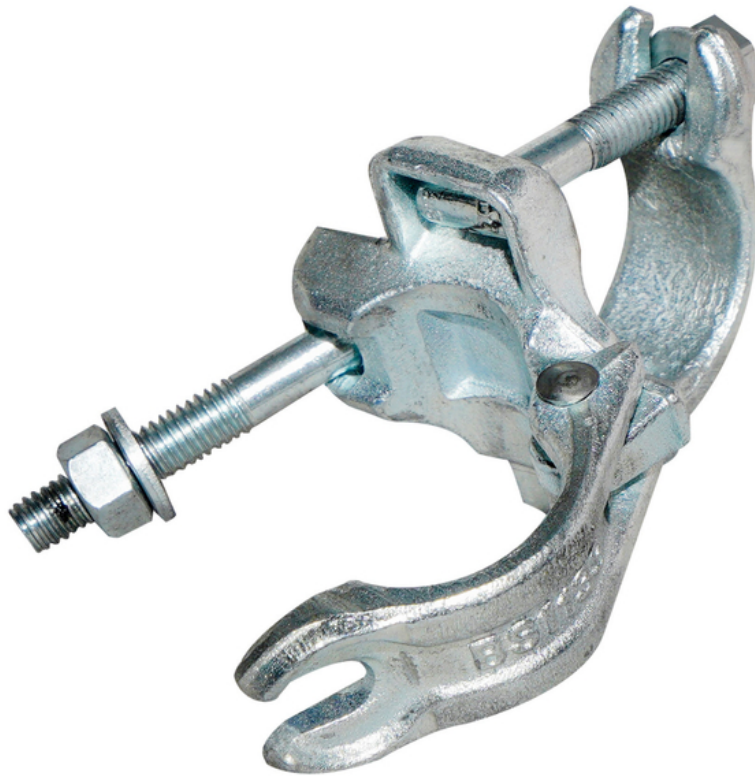

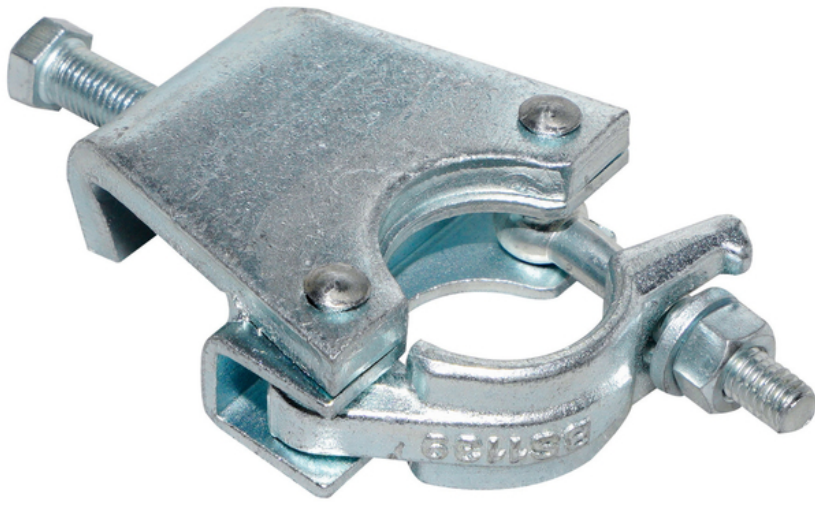

One of the primary attributes of our scaffolding coupler is its surface treatment. The product is galvanized, offering an extra layer of protection against corrosion and the elements. This treatment extends the lifespan of the coupler and maintains its integrity even in harsh weather conditions, ensuring that the scaffolding structure remains secure and durable over time. The galvanized finish also provides a clean and professional appearance, which is essential for maintaining the overall aesthetics of the construction site.

The scaffolding coupler is specifically designed for construction applications. It is a versatile product that can be used in a wide array of building projects, including residential, commercial, and industrial constructions. The ease of assembly and disassembly makes it a preferred choice for contractors who require a quick and efficient solution for their scaffolding needs. Its compatibility with different types of scaffolding systems ensures that it can be integrated seamlessly into existing structures, providing added flexibility for construction professionals.

A standout feature of our scaffolding coupler is its high strength. Constructed from premium quality steel, it is engineered to bear heavy loads and withstand the stresses of construction activities. The robust design of the coupler ensures that it can support the weight of workers, materials, and equipment without compromising on safety or performance. Its high strength also means that fewer couplers are needed to maintain the structural integrity of the scaffolding, resulting in cost savings and a more streamlined construction process.

### Technical Parameters:

Attribute	Description
Name	Scaffolding Coupler
MOQ	1000
Surface Treatment	Galvanized
Standard	EN74-1
Material	Steel
Application	Construction
Color	Silver
Feature	High Strength
Package	Container

### **Packing and Shipping:**

**Product Packaging for Scaffolding Coupler:** Couplers are then grouped into sturdy, corrugated cardboard boxes, which are sealed and banded for added security. Box quantities are determined based on order size and coupler dimensions to ensure safe handling and efficient use of space. Labels with product information and handling instructions are affixed to the exterior of each box.

**Shipping for Scaffolding Coupler:** Completed boxes of scaffolding couplers are palletized and shrink-wrapped to maintain stability during transportation. Pallets are carefully loaded onto the delivery truck using a forklift and secured in place to prevent movement that could lead to damage. Shipping is conducted through trusted freight carriers to ensure timely and safe delivery to the destination. Tracking information and all necessary documentation for the shipment are provided to the customer upon dispatch.
