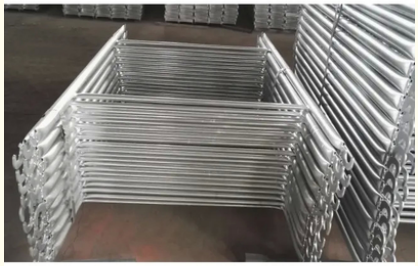
Pre Galvanized Steel Tubular Frame Scaffold Main Frame Scaffolding Q235

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS ISO
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: 10.5-35.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC



Product Specification

- Shipping Origin: China
- Arrival Time: 10-15
- Size: Customized
- Material: Q235
- Load Capacity: High
- Color: Steel/Spray Plastic
- Highlight: **Main Frame Scaffolding Q235**, **Q235 Tubular Frame Scaffold**, **Pre Galvanized Steel Tubular Frame Scaffold**

Product Description

Product Description:

At the heart of our system are the Frame Upright components, which form the vertical support structure. These uprights are carefully manufactured to provide a sturdy base for the entire scaffolding frame system. Designed to interlock securely with cross braces and other scaffolding components, our Frame Uprights are integral to maintaining the structural integrity of the entire scaffold.
Complementing the Frame Uprights are the Portal Frame Scaffold Beams, which span horizontally and provide additional support to the structure. These beams are designed to connect with the uprights seamlessly, creating a secure and stable platform for construction activities. The interconnectivity of these beams with the rest of the scaffolding system ensures a cohesive and strong framework capable of handling the demands of various construction environments.
In summary, our Frame System Scaffolding product embodies strength, versatility, and reliability. Made from Q235 material and available in steel or spray plastic finishes, our system is built to last. With the ability to customize the size to fit the unique demands of each project and a high load capacity, this scaffolding system is a vital tool for efficient and safe construction. Whether shipping from China for international projects or serving local markets, our Frame System Scaffolding is the go-to choice for builders who require a dependable and adaptable solution.
