Scaffold Clamping System	High-Quality Japanese Scaffold Accessories

Applications:

The Scaffolding Coupler is a high-quality steel product that is designed to provide a secure connection between scaffolding tubes. With its EN74-1 standard and SGS certification, this coupler scaffolding is a reliable and durable solution for construction projects of all sizes. The BT205 model number is a popular choice, manufactured in China Tianjin with a silver finish that provides a sleek look to any job site. These High-Quality British Couplers are commonly used in construction projects that require a sturdy and reliable connection between scaffolding tubes. They are suitable for use in a range of applications, including building construction, bridge construction, and industrial maintenance. The Scaffolding Coupler is easy to use and can be quickly installed without any special tools or training.
In addition to the British Couplers, the Scaffolding Coupler is also compatible with a range of High-Quality Japanese Scaffold Accessories. This makes it a versatile product that can be used in a range of different construction scenarios. It is also a popular choice for DIY enthusiasts who are looking to build their own scaffolding systems.
The minimum order quantity for the Scaffolding Coupler is 1000, and the price ranges from 8.5 to 15.8. The packaging details include bundling for easy storage and transportation. The delivery time is typically between 15-25 days, with payment terms of TT/TC. Whether you are a professional contractor or a DIY enthusiast, the Scaffolding Coupler is a reliable and cost-effective choice for your construction needs.
